Over 75 Years of Experience

Panorama Antennas is a privately owned family business, now in its third generation, and leading designer and manufacturer of antennas for wireless communication. Established in London in 1947, Panorama started life as a manufacturer of consumer products and buoyed by huge demand in 1952, began manufacturing TV components and antennas. With the transistor radio trend of the 1960s, Panorama's expert knowledge swiftly led the company into the manufacturing of communication antennas.

Throughout the 1970s and 80s, Panorama evolved to become the first specialised communication antenna manufacturer in the UK, developing a range of cellular antennas to coincide with the launch of the mobile phone network in Britain. 1990 was a year of huge change as Panorama found itself revolutionising cellular glass mount antenna technology, filing a patent application for the first ever solid state coupling circuit. Through creating a new benchmark for quality in the production of components and leading technology development, Panorama has grown side by side with the cellular telecommunications industry.

Today Panorama produces antennas for the world's leading communication companies and has grown to include over 100 staff in 5 international sales offices, as well as operating 4 fully owned subsidiaries. Manufacturing, design and development remain located in London less than a mile from the original factory. Our network of international sales representatives means that all customers get the attention and advice they require, providing local support on a global scale.

Antennas for Next Generation

Panorama's constant cutting-edge research ensures that our antennas meet the demands of the very latest technology. With over 75 years experience in delivering world-class antenna products, Panorama's current product range reflects our unparalleled expertise in providing high-quality performance antennas.

M18-EXT-SLT

Thick Panel Extender kit

- Allows installation of antennas with M18 bush fitting to thick mounting panels. The kit includes a 38mm length, slotted & threaded extender tube and replacement slotted washers and split nut for easy cable management.

For use with

Panel mount antennas with M18 bush fitting

KRV Reinstall Kits

Reinstall Kits

Essential when the antenna is to be de-installed and then re-installed on a different vehicle. Using the specific re-installation kit for your low profile antenna will ensure that the antenna effectively seals to the mounting panel. Each kit comprises of a replacement adhesive pad and other parts required specific to the type of antenna.

Tip: After removing the antenna, always ensure that any remnants of the old adhesive pad are removed and the base plate is clean before fitting the new pad. Always refer to the original installation instructions for the antenna – if not to hand, these can be downloaded from Panorama's website if required.

Part no.

For use with

KRV400

Great White® 5G series Mako® & Mako® 5G series

KRV401

MiMo Sharkee® (GPSD / SHKG) series

GP-INI922

Sharkee® (GPSB5G / FINB) series

*Please note the antenna is used for demonstrative purposes only and is not supplied with the reinstall kit.
